New Propane Customers

Thank you for the opportunity to be your propane supplier.

Below is a list that will help insure uninterrupted delivery for your propane.

All accounts are set up on an automatic delivery schedule, however it is important to keep an eye on the tank and if you have not received a delivery by the time the gauge reads 20% remaining, please give us a call. If a tank runs out, it is a federal requirement that a pressure check and system check be performed which requires that someone is home to allow us in to perform the leak check. Reoccurring out-of-gas calls do carry a \$39.00 charge for single appliances and \$55.00 for multiple appliances to complete the Leak Check.

SUPPLEMENTAL HEAT USE. Space heaters, fireplace inserts, and logs that are not the main source of heat, are not generally used on a consistent basis. Without consistent usage it is very difficult to determine when a delivery is needed. For accounts with supplemental heat, please keep an eye on your tank to aid in the delivery process.

The delivery slip will also be your invoice and you may pay from it. Terms for propane are net due within 10 days of delivery. Monthly statements are mailed for past due balances only.

Tank Lease

Minimum usage If minimum gallonage is delivered annually, there is no tank fee.

50 gallon tanks Minimum usage 75 gallons/ year. Annual fee for less than 75 gallons \$50.00

100 gallon tanks Minimum usage 150 gallons/ year. Annual fee for less than 150 gallons \$50.00

Tanks removed at customers' request prior to the 1st year anniversary will not receive credit for any remaining propane.

The price of propane is based on your annual consumption. The price is based on a set range of gallons. The retail price of propane can fluctuate throughout the year, and the billing price will be the prevailing price on the day of delivery.

New installations will be billed at the price of propane on the day of installation.

There is an initial TANK INSTALLATION charge of \$75.00. This charge includes setting a tank, hooking up to a previously existing line, leak-checking the complete system. Line installation or additional work can be done at an additional cost.

NEW HOMES-Please be sure the ground where the propane tank will set has been properly back-filled. Service calls to re-level tanks due to the ground settlement will require a labor charge.

PLEASE DO NOT MOVE OR HAVE ANYONE ELSE MOVE THE PROPANE TANK. IF YOUR TANK WOULD NEED TO BE MOVED PLEASE CALL THE OFFICE.

We greatly appreciate your business.

Aboveground ASME Tanks - Spacing

Notes:

- 1: Regardless of its size, any ASME container filled on site must be located so that the filling connection and fixed maximum liquid level gauge are at least 10 ft from any external source of ignition (e.g., open flame, window A/C, compressor), intake to direct-vented gas appliances, or intake to a mechanical ventilation system. Refer to 6.3.9.
- 2: Refer to 6.3.9.
- 3: This distance may be reduced to no less than 10 ft for a single container of 1200 gallon water capacity or less, provided such container is at least 25 ft from any other LP-Gas container of more than 125 gallons water capacity. Refer to 6.3.3.

NFPA 58, 2004 Edition, Annex I, Figure I.1(b) Aboveground ASME Containers

(This figure for illustrative purposes only; local approved codes, regulations and the Authority Having Jurisdiction shall govern)
